

CUT
table

Nature, made central.

CUT follows the natural geometry of the tree, preserving its original contours in a form that feels both raw and refined. A table with strong architectural presence, designed to define space.
Defined by its material, not applied form.

FOR PROJECTS AND SPECIFICATION

CUT is a solid wood table shaped by the natural geometry of the tree. Its free-flowing edges follow the timber's original contours, creating a sculptural presence that defines the room.

Form and function. No compromise.

Key attributes

- Solid wood construction
- Crafted from wide planks for material continuity
- Form derived from the natural geometry of the tree
- Material-driven design, not applied form
- Strong architectural presence
- Works across dining, meeting and shared environments
- FSC-certified wood
- Designed and manufactured in Sweden
- Built for long-term use in contract environments

Dimensions/ Weight

L 2800 mm, 29.1" × D 1000 mm, 110.2" × H 740 mm, 39.4"
(Custom sizes available on request)

Weight: Approximately 130kg, 287 lbs (The weight may vary depending on the natural materials used)

Meet The Designer

Richard Muskala, Mizetto Lab

CUT is the first table developed in-house by Mizetto Lab, led by Richard Muskala, whose work builds on more than a decade of experience in design.

“We originally created CUT for our own home, as a way to bring nature closer. In many ways, the table was already there. We just revealed it. It quickly became more than a table. The centre of the room.”
