

URBAN WOODS

2025 CATALOG

Since 2010, our family-run business in Romania has been crafting unique dining and coffee tables from salvaged wood.

We specialize in reclaiming old trees with natural imperfections that other manufacturers might reject. Instead of hiding these flaws, we celebrate them by filling knots and defects with transparent epoxy resin, creating one-of-a-kind pieces that showcase the wood's natural beauty.

Our process is meticulous and time-intensive, with the wood drying for up to three years in our factory before being transformed into stunning tables. From salvaging standing trees to delivering the finished product to your home, every step is handled with care, passion, and dedication to quality.
